Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The difference between the Yu reference and the invention was discussed. Specifically, the Yu reference teaches obtaining the component or content and displaying that content at run-time by previewing scripts in a client browser. However the invention has described in the submitted amendment describes that the design-time representation is rendered according to the layout of the components in the container. Therefore it improves upon Yu since it allows the container to be viewed within the WYSIWYG editor at design time, which differs from previewing in a client browser. By modifying and accessing the layout components in design view editor the user does not have to modify or understand scripting code has required by Yu. Therefore the amendment appears to overcome the reference however all responses are subjected to further search and consideration.
